PROFILE SUMMARY

Data Analyst with hands-on experience in data quality validation, root cause remediation, and reporting across SQL, Power BI, and Python. Skilled in identifying data inconsistencies (duplicates, missing values, formatting errors) in large datasets and fixing them to improve accuracy for downstream reporting. Comfortable working across business and technical teams to translate requirements into structured data outputs. Exploring applied AI tools (LLMs, Claude API) to support analytics workflows.

EXPERIENCE & INTERSHIPS

Data Analyst Trainee | Dream With Data (DwD), Wardha, Maharashtra *Dec 2025 – Present*

- Performed data quality root cause analysis on raw business datasets, identifying and resolving duplicate records, missing values, and inconsistent formatting prior to reporting.
- Developed 30+ SQL queries and 5+ Power BI dashboards for business reporting and KPI tracking, ensuring data accuracy and consistency across sources.
- Validated and standardised datasets using Excel, SQL, and Power BI to support reliable, decision-ready reporting outputs.
- Conducted exploratory data analysis (EDA) to identify trends, anomalies, and data usage patterns supporting business insight generation.

Power BI Intern | Microsoft Elevate × AICTE (Remote) *Jan 2026 – Feb 2026*

- Completed 4-week AICTE-certified internship on Power BI for Business Applications under Emerging Technologies.
- Built dashboards and data models translating business reporting requirements into structured visual outputs.

Data Analysis & LLM Intern | VOIS × AICTE × Edunet Foundation (Remote) *Sep 2025 – Oct 2025*

- Completed AICTE-certified virtual internship on Conversational Data Analysis with Large Language Models (LLMs).
- Applied LLM-based tools to support data analytics workflows, exploring AI-assisted approaches to business process improvement.

AI & Cloud Intern | IBM SkillsBuild × AICTE (Edunet Foundation, Remote) *Jul 2025 – Aug 2025*

- Completed 4-week AICTE-certified internship on Emerging Technologies: Artificial Intelligence and Cloud Computing.
- Used IBM SkillsBuild and IBM Cloud Platform to explore AI tools, cloud services, and structured data workflows.

PROJECTS

HR Analytics — Employee Data Quality & Insights | *MySQL*

- Designed and executed 50+ SQL queries on a 1,500-row HR dataset using JOINS, CTEs, Subqueries, and Window Functions to define and validate key employee data elements.
- Analysed employee attrition, salary, demographics, and departmental performance, documenting query logic and data definitions to support consistent downstream HR reporting.

Supply Chain & Logistics Analytics | *Python, MySQL, Power BI*

- Analysed a 10,325-row supply chain dataset, performing data cleaning and root cause checks to identify delivery delays and vendor trends; built an interactive Power BI dashboard for ongoing performance monitoring.

E-Commerce Sales Dashboard | *Power BI, DAX, Power Query*

- Built an interactive dashboard on a 9,993-row e-commerce dataset tracking revenue, profit, customer segmentation, and product performance.
- Created 10+ DAX measures (YTD Revenue, Profit Margin, Growth KPIs) and applied Power Query transformations for reporting automation and data consistency.

Customer Churn Analytics | *Python, Power BI*

- Analysed a 50,000-row customer dataset to identify churn behaviour and retention patterns, validating data quality prior to modelling; built visual reports and segmentation dashboards to support retention strategy.

CERTIFICATIONS

- Microsoft Elevate × AICTE — Power BI for Business Applications (Jan–Feb 2026)
- VOIS × AICTE × Edunet Foundation — Conversational Data Analytics with LLMs (Sep–Oct 2025)
- IBM SkillsBuild × AICTE — Emerging Technologies: AI & Cloud (Jul–Aug 2025)
- Anthropic — Building with the Claude API
- TCS iON Career Edge — Data Analytics

TECHNICAL SKILLS

Programming & Scripting: Python (Pandas, NumPy), SQL — used for data validation, automation, and analysis

Data Quality & Governance: Root cause analysis, data cleaning & standardisation, data definitions/documentation, EDA

BI & Reporting: Power BI (DAX, Power Query, Data Modeling), Excel, KPI Reporting, Dashboard Development

Database: MySQL — JOINS, CTEs, Subqueries, Window Functions | **AI & Emerging Tech:** LLM workflows, Claude API
